

# Week 6 - AI: Pop Culture, Movies and More

AI has featured in books, movies and more. These have fed back into AI research and inspired innovation.

As you make your own movies using AI, complete the AI In Pop Culture Timeline, and write about AI you know about.

## AI In Pop Culture Timeline

1927		
1956		
1968		
1986		
2008		

What other examples of AI can you think of in books, movies and other stories?

Cut these out and place next to the correct date and event description in the timeline.

### Forbidden Planet

With his bulbus hrad Robby from Forbidden Planet was an early example of a robot that in some ways was more human than the human characters. Robby had a dry sense of humour, something echoed in the Jetsons (1962) and Lost in Space (1965) only a few year later.

### Metropolis

While there had been intelligent robots in fiction, including The Automaton from The Master Mystery (1919) and Tik-Tok in Ozma of Oz (1907), the AI-driven robot from the silent movie Metroplis popelled intelligent computers into the public mind.

### WALL·E

Similar to the first movie in this timeline, large parts of this movie are almost silent. This animation once again shows us AI-powered robots that have as much human spirit as their creators.

### 2001: A Space Odyssey

The emotionless voice and piercing red dot stare of HAL 9000 in 2001: A Space Odyssey set a model for how AI was shown in movies that remains more that half a century later.

### Short Circuit

The retanglar-headed Johnny 5 gains self-awareness and escapes from his creators in the family movie, Short Circuit. Children of the 1980s all know his catchphrase "Johnny 5 is alive".

Cut these out and place next to the correct date and picture in the timeline.

## Week 6 - AI: The Answers!

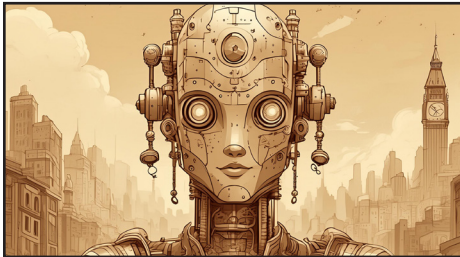

Space for Teach Primary Logo

Look at the completed timeline below. How did you do?

Have many other examples of AI in pop culture could you think of? Need to research for some more? Ask your AI platform for help.

### AI In Pop Culture Timeline

1927

#### Metropolis

While there had been intelligent robots in fiction, including The Automaton from The Master Mystery (1919) and Tik-Tok in Ozma of Oz (1907), the AI-driven robot from the silent movie Metropolis propelled intelligent computers into the public mind.

1956

#### Forbidden Planet

Robby the robot from Forbidden Planet was an early example of a robot that in some ways was more human than the human characters. Robby had a dry sense of humour, something echoed in the Jetsons (1962) and Lost in Space (1965) only a few years later.

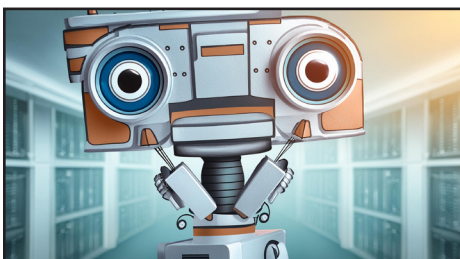

1968

#### 2001: A Space Odyssey

The emotionless voice and piercing red dot stare of HAL 9000 in 2001: A Space Odyssey set a model for how AI was shown in movies that remains more than half a century later.

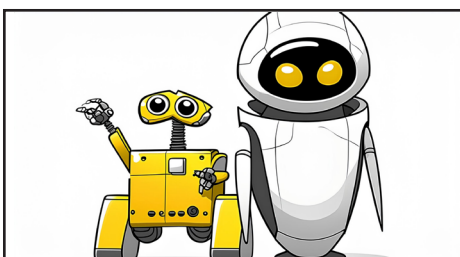

1986

#### Short Circuit

The rectangular-headed Johnny 5 gains self-awareness and escapes from his creators in the family movie, Short Circuit. Children of the 1980s all know his catchphrase "Johnny 5 is alive".

2008

#### WALL-E

Similar to the first movie in this timeline, large parts of this movie are almost silent. This animation once again shows us AI-powered robots that have as much human spirit as their creators.
